Subject: Site “*Foce Rio Posada*”: request of the Ramsar designation.

As known, with the Decree of 17 May 2018 the Ministry for the Environment, Land and Sea Protection identified the “*Foce del Rio Posada*” site from Italy as a wetland of international relevance in the framework of the Ramsar Convention.

The area expands for 736 hectares and it is located within the boundaries of the Tepilora Regional Natural Park in the north east of Sardinia. This site is characterized from a high naturalistic value, including valuable wetland habitats with a high biodiversity; though not particularly large, because of its rare biogeographical and ecological characteristics the site meets 4 of the 9 criteria established by the Ramsar Convention.

Thanks to the work carried on by the Regional Park in the past months, the site characteristics data have been now included on line into the Ramsar Information Sheet.

With this letter, I therefore formally request to designate Ramsar site “*Foce Rio Posada*” and to include it in the Wetlands List in according with the Ramsar Convention.

Yours faithfully,

The Head of Administrative Authority

Dott. Antonio Maturani
